Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Applicant's arguments filed 8-19-04 have been fully considered but they are not persuasive.

Double Patenting rejection is withdrawn in light of the Terminal Disclaimer received 8-19-04. However, it is also noted that Application Serial #10/242,741 has been abandoned at the time of this Office action.

The following rejection is maintained herein:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 6-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bleys (5,521,226).

Bleys discloses preparations of flexible polyurethanes prepared at isocyanate indexes as claimed isocyanates of blended polyisocyanates and blended polyols having weight, functionality, and number values as well as oxyalkylene contents as claimed, water, and other additives (see the entire document).

Bleys differs from applicants' claims in that it does not disclose the use of a high amounts of a high EO polyol. However, Bleys discloses (see column 1 lines 16-24)

Art Unit: 1711

motivation for variation in amounts of high EO polyols for the purpose of control of reactivities and open cell contents and discloses (see column 1 lines 55-65) selectability of its second polyol to be inclusive of the high EO polyols of applicants' claims. Accordingly, it would have been obvious for one having ordinary skill in the art to have utilized elevated amounts of high EO content within the teachings of Bleys for the purpose of modifying reactivities and physical properties in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results. Further, it has long been held that where the general conditions of the claims are disclosed in the prior art, discovering the optimal or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233; *In re Reese* 129 USPQ 402. Similarly, it has been held that discovering the optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Applicants offer no suitable showing of unexpected results which overcome the instantly held position of obviousness.

Applicants' new arguments have been considered. However, rejection is maintained as set forth above. The position is maintained that motivation within the cited art to vary the amounts of the polyol components is sufficient to sustain a position of obviousness, and sufficient unexpected results commensurate in scope with the claims are not of record which overcome the instantly held rejection. Additionally, the term "low-odor" is of little value in defining a claim limitation without any definition of the degree of odor reduction and/or odorizing elements to which reference is being made.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
